## ABOUT US

Our professional therapists have extensive knowledge in biomechanics and the muscular/skeletal system. All members of our expert staff are Certified Massage Therapists who have been trained in the US and Europe and continue to study and train in the latest trends and techniques. They will analyze your unique needs and adapt appropriate healing techniques to rebalance, relax and rejuvenate you.

THERAPY PROFESSIONALS, INC.

## SWEDISH MASSAGE

Developed in the 1700's, this European technique uses a firm but gentle pressure to help rid the body of toxins, increase oxygen flow in the blood, improve circulation and flexibility, and reduce stress both emotional and physical. Used regularly for stress management.

## HOT STONE MASSAGE

Experience the nurturing effects of deep soothing heat as smooth river stones are placed on your body to massage and revive tired aching muscles. Ideal for countering the effects of the harsh Chicago winter or for added comfort any time of year.

## CLINICAL APPROACH MASSAGE THERAPY

Specific therapy is administered to improve musculature conditions such as joint soreness, pinched nerves, range of motion and muscle functioning. The goal is to alleviate painful muscle conditions.

## DEEP TISSUE MASSAGE

While similar to clinical massage described above, the deep tissue massage option focuses on the deeper tissue structures of the muscle and connective tissues. The pressure is generally more intense and focused while treating the entire body with specific therapeutic work.

## CHAIR MASSAGE FOR CORPORATE GATHERINGS OR SPECIAL EVENTS

A great way to relax in the middle of the day. This fully dressed, brief 15 minute treatment can relax tension in the back, neck, shoulders on the specially designed chair.

## SPORTS MASSAGE

Designed to optimize performance from weekend warriors through to more serious athletes. Sports massage is a more interactive session between you and the therapist and improves muscle performance through facial release, body mobilization and tension-release techniques.

## REFLEXOLOGY

An ancient therapy practiced as far back as early Egypt that focuses primarily on the feet and hands. Pressure point therapy is applied to key zones and Meridian points which correspond to different organs in your body. The therapist applies pressure and movement to these points to release organ blockage, stagnation and improve circulation.

## AROMATHERAPY

This fragrant, comforting therapy uses the power of essential oils to simulate the body's natural healing mechanisms. Aromatic extracts are distilled from plants, trees and herbs in order to create these essential oils. Topical application, inhalation and massage with oils can stimulate well-being and encourage a healthy mental, physical and emotional body.

## SUGAR HONEY POLISH

Loaded with luscious sugar granules to gently exfoliate dead skin cells, pure honey to nourish and moisturize, and selected essential oils of Jojoba, Apricot, Borage, Aloe, Olive, Grape seed and Rosa Mosqueta to leave your body feeling silky smooth and totally satisfied (followed with your choice of massage).
